

LAXMIBAI HOUSE

कन्ये ममाग्रतो भूयाः

"Feminine is not just a trait, but a force—soft yet strong, tender yet fierce. It's the grace that nurtures and the power that inspires."

ABOUT THE GREAT PERSONA

Lakshmibai House is named after Matoshri Lakshmibai Saheb, mother of our founder Shri Siddharaj Manik Prabhu Maharaj. After the Mahasamadhi of Shri Shankar Manik Prabhu Maharaj, the responsibility of bringing-up six-year-old Siddharaj Maharaj fell on her shoulders. She made the difficult decision of sending her only son to the Scindia School, 1300 kilometers away from home, which resulted in the all-round development of Shreeji's personality. Matoshri Lakshmibai Saheb was a pillar of strength to Shreeji throughout her life. The crest of the house is a lotus which symbolises purity and enlightenment. The motto is कन्ये ममाग्रतो भुयाः ", which means: "Let our daughters always be ahead of us".

THE BEGINNING OF THE JOURNEY

A school assembly plays a crucial role in building school spirit, reinforcing shared values, and creating a cohesive and supportive learning environment.

Assemblies often include activities such as the recitation of national anthem, presentation, speeches, or performance by students and the discussion of important topics or themes such as values, character development, or current events. They can also be used to recognize students for their academics, athletic, or extracurricular accomplishments, thus encouraging a culture of recognition and motivation.

Today, I want to take you on a journey beyond our planet—to the vast and mysterious expanse of space. Space exploration is one of humanity's greatest achievements. It represents our unending curiosity and our desire to explore the unknown.

From the first moon landing to the exploration of Mars, each mission has brought us closer to understanding the universe and our place within it. But space exploration is more than just an adventure; it has practical benefits for life on Earth too. The technology developed for space missions has led to innovations we use every day—like satellite communications, GPS, and even medical advancements.

One of the most exciting aspects of space exploration is the possibility of discovering life beyond Earth. As we explore distant planets and moons, we're not just looking for rocks and ice—we're searching for answers to some of the biggest questions we've ever asked. Are we alone in the universe? What is the future of humanity in space?

But space exploration is also a reminder of how precious our own planet is. From space, Earth appears as a small, fragile world—one that we must protect. The more we explore the cosmos, the more we realize how unique and valuable our home is.

In conclusion, space exploration is not just about looking up at the stars; it's about expanding our knowledge, inspiring future generations, and protecting the only home we've ever known.

Thank you!

Student Chronicles:

Daddy
Even though I'm little
Can't express myself with words
Even though my thoughts
For now remain unspoken
I really want to know that
The way you look at me
smile at me and talk to me
always ways you know how to make
happy
By doing little thing for me
Being your child is fun
And you are the best daddy
In this whole world
I love you daddy.
