## SIDDHARAJ HOUSE

Siddharaj house is named after our founder Shri Siddharaj Manik Prabhu Maharaj. He was the 5<sup>th</sup> Pithadhipathi of Shri Manik Prabhu Samsthan. After completing his education at the famous Scindhaia School in Gwalior, Shriji felt the need for a modern-day Gurukul for the children of his region.

Thus, Manik Public School established in 1972. Shriji was also a sportsman at heart. His credited with introducing games such as cricket to this region. All the educational institutions owe their existence to Shriji's board educational and social vision. Shri Manik Prabhu Samsthan and the Sakamata Sampradaya grew manifold during Shreeji's time.

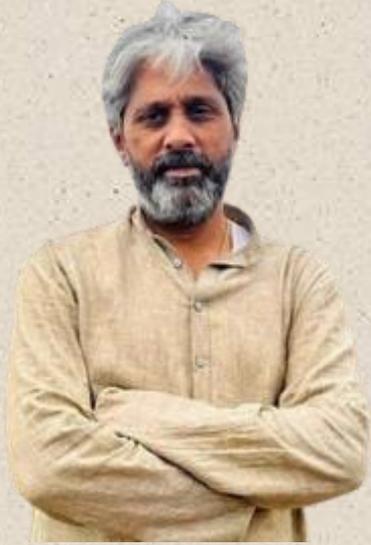

The crest of the house includes a Book, Pen and Deepa symbolising the flame of knowledge. The motto of the house is

‘श्रद्धावान् लभते ज्ञानम्’

Which means: ‘He who is full of faith attains the supreme wisdom.’

**NCC UNDER OFFICER: SAGAR BUKKA**

**Jai Hind!**

I am honoured to share insights about the National Cadet Corps (NCC), a premier youth development program in India. NCC focuses on grooming young minds into responsible citizens by instilling qualities like discipline, time management, and leadership.

Joining NCC offers numerous benefits, including enhanced personal character and career development. I, Sagar Bukka, had the privilege of being selected as the NCC under Officer from The Manik Public School. The announcement was both nostalgic and proud, marking the beginning of a challenging yet rewarding journey.

Attending the NCC camp was a transformative experience. Initially, I felt the weight of my responsibilities as a captain, but I soon found myself deeply engaged in camaraderie and personal growth. The rigorous training sessions and obstacle courses were both daunting and exhilarating, leaving a lasting impact on my persona.

The NCC experience has been cathartic, shaping me into a more disciplined and confident individual. I encourage everyone to consider joining NCC and embrace the opportunity for personal development and growth.

Jai Hind!

Everybody choose to be same  
But I am not of the similar game  
I mostly hate similarity  
The difference gives us clarity  
Fighting for the goals makes us strong  
But by getting distracted never prove yourself wrong  
The things you feed to mind  
The universe will help to find  
So keep in yourself the kind of faith  
That gives you a strong mindset  
May it become very hard and late  
But remember every story we can recreate  
Many times you get confuse  
So just kick your heart and make your mind choose  
You would be walking in the lonely rains  
Making you set to pains  
But still remember  
The pain builds a man and comfort boys  
Never show your hard work  
But just ensure your success makes noise  
You may be full of dilemma  
But at last you need to be real sigma

## Discipline

In the morning's early light,  
We rise with goals in sight,  
With discipline as our guiding star,  
We know we'll reach both near and far.  
It's in the steps we choose to take,  
In every choice, we make or break,  
A silent strength, a steady hand,  
That helps us grow and firmly stand.  
Through discipline, we learn and grow,  
It teaches us what we need to know,  
In every task, both big and small,  
Discipline helps us give our all.  
So let us cherish this noble way,  
In our hearts, let it forever stay,  
For with discipline, we find our might,  
And reach new heights, as day turns to night.

## The Journey of Growth: Embracing Challenges and Celebrating

Success As the school year unfolds, I want to share a message about embracing the journey of growth, understanding that challenges and successes are both integral to achieving your fullest potential. The path to personal and academic growth is not always smooth; it is filled with ups and downs, but it is how you navigate this journey that will ultimately define your success. Challenges are a natural part of life and learning.

When faced with difficult tasks, exams, or personal hurdles, it's easy to feel overwhelmed or discouraged. However, these moments are not roadblocks but opportunities for growth. Each challenge you face is a chance to develop your skills, build resilience, and strengthen your character. It is through overcoming these obstacles that you learn the most about yourself and your abilities. Consider a time when you faced a difficult situation and pushed through despite the odds. Reflecting on that experience, you may realize that it was your persistence and effort that led to growth and eventual success. This is the essence of resilience—the ability to adapt and persevere in the face of adversity. Embrace challenges with a mind-set of curiosity and determination. Ask yourself, “What can I learn from this?” rather than focusing solely on the difficulty of the situation. Success, on the other hand, should be celebrated, but not to the point of complacency. Each achievement, whether big or small, is a testament to your hard work and dedication. However, it is essential to recognize that success is a journey, not a destination. Acknowledge your accomplishments, but continue striving for growth and improvement. Set new goals and challenge yourself to reach even higher. Moreover, remember that success is not a solitary achievement. It is often the result of support from teachers, family, and friends. Cultivate positive relationships and seek advice and encouragement when needed. Collaboration and support networks are invaluable resources on your path to success. Taking care of your well-being is also crucial. Balance your academic efforts with activities that nourish your mind and body. Engage in hobbies, exercise regularly, and spend quality time with loved ones. A healthy balance will keep you motivated and resilient, enabling you to tackle challenges with a clearer and more focused mind. It is also important to understand that failure is not the opposite of success but a part of it. Everyone experiences setbacks, and they are not reflections of your worth or potential. Instead, view failure as a learning opportunity. Each mistake or setback provides valuable insights and helps you grow stronger. The key is to learn from these experiences and continue moving forward with renewed determination. As you navigate your educational journey, keep in mind that growth is a continuous process. Embrace each challenge with optimism, celebrate your achievements with humility, and never stop striving for improvement. Your journey is uniquely yours, and with resilience, hard work, and a positive mindset, you will find that you are capable of achieving far more than you ever imagined.

In conclusion, the journey of growth involves embracing challenges, celebrating successes, and continuously striving for improvement. Approach each obstacle with courage, recognize and cherish your accomplishments, seek support when needed, and maintain healthy balance in your life. By doing so, you will not only navigate your current challenges with grace but also pave the way for a fulfilling and successful future.

## The Power of Being Educated

Being educated often makes you feel powerful. Why is that?

Imagine you did not know how to use a mobile phone, a laptop, a match stick or a bulb. What is the use of possessing something that you do not know how to use? In the beginning of time, it was found out that hitting two rocks together produces sparks that can start a fire. Every little thing you come across can teach you something or the other. The more you know, the more powerful you become.

Knowing how to drive a car would come in handy when you have to go somewhere with more people travelling with you. Knowing how to fix a pipe can help you when someone accidentally breaks off a pipe and water keeps flowing. Likewise, everything you learn will help you in one or the other way. Therefore, good education can be defined as the general and specific knowledge people gain by being taught or by experience.

“Education is not the learning of facts, but the training of the mind to think”, according to Albert Einstein. Gathering a load of information is easily possible in the present age of the internet and technology. Being able to answer every question does not guarantee or prepare you for a life where experience and knowledge is accounted for.

--Mr. Pawan Sharma

**The best way to succeed in life is to compete with yourself rather than anyone.**

**Successful Mantra:-**

- 1) To set clear vision.
- 2) Always think big and positive.
- 3) Obsession for goal.
- 4) Work hard along with smart in the right direction.
- 5) Sweat behind the scene.
